

Ceramic DIY Kit Instructions

SUPPLIES

Paintbrushes

Paint

Glaze

Light

Colored Bulbs

Step 1

Start by painting your main color using the foam brush provided. It is best to apply 2-3 thin coats. Before moving on to the next step we recommend turning your piece upside down to check for missed spots.

Step 2

Using detail brushes, add in any extra details. We used a dry brush technique to add "snow" to our branches and to give dimension for the beard of the gnome. For dry brushing, lightly dip the tip of the brush into the paint, make sure the bristles still appear separate instead of clumped together. For optimal results, the brush should be as dry as possible. Blot the brush on a cloth or paper towel to remove the excess paint while retaining a hint of color. Brush on a single coat of paint with light pressure and short, fast strokes.

Step 3

Allow your project to dry completely and then apply the glaze provided with your foam brush and let it dry again.

Insert your light and bulbs.

Step 4

Now step back and admire your creation! Take a photo, share with your friends on Social Media, and tag us [@thecreativegetaway](#) because we love seeing your creations!

Step 5

Thank you so much for supporting
my small business!
Happy Crafting!
