

Welcome Honey Bee Kit Instructions

Step 1

Using the wet wipe and the brown paint cover the top half of your board as well as the pieces of the honeycomb. Set these pieces aside to dry.

Step 2

Using your foam brush paint the pieces of honey and the bottom half of your board yellow. For the second layer of honey, we mixed a little bit of white to the yellow first to create a slightly different shade of yellow. This is optional.

Step 3

Next, using the white wedges, paint the remainder of your pieces. Wipe off the excess paint and dab up and down gently on the pieces to cover them, but be mindful to not get paint on the edges of the cutouts. Since these are laser-cut pieces the edges do not always cover well. Once they are painted, set them aside to dry.

Step 4

While your pieces dry you can make your bow. You can either leave the ends straight or cut a dovetail in them like ours. Take your 3 pieces of ribbon and pinch them in the center one at a time, criss-cross them, and then tie the twine around the center. Leave a little bit of your twine hanging down in the back so that you have enough to tie it onto your door hanger.

Step 5

Once all of your pieces are painted & dry, use the glue provided and assemble your project as shown below. It is best to start at the bottom and work your way up.

Step 6

When all of your pieces are glued down, add the large piece of twine to hang your door hanger with. Tie your bow onto the larger piece of twine.

Step 7

Now step back & admire your new adorable honey bee creation. Make sure to take a picture and tag us on social media @[thecreativegetaway](https://www.instagram.com/thecreativegetaway) because we love seeing your finished projects..

Thank you so much for supporting
my small business!
